

DECLARAȚIA DE PERFORMANȚĂ

DoP Nr.: MKT-161 - ro

- ◇ **Cod unic de identificare al produsului-tip:** **Ancora de fixare sarcini grele SLZ**
- ◇ **Utilizare (utilizări) preconizată (preconizate):** Ancora mecanică (oțel zincat) în dimensiune 14 / M10 pentru ancorare în beton, a se vedea anexa / Annex B
- ◇ **Fabricant:** MKT Metall-Kunststoff-Technik GmbH & Co.KG
Auf dem Immel 2
67685 Weilerbach
- ◇ **Sistem sau sisteme de evaluare și verificare a constanței performanței:** 1
- ◇ **Documentul de evaluare european:** **EAD 330232-00-0601**
Evaluarea tehnică europeană: **ETA-09/0342, 01.03.2018**
Organismul de evaluare tehnică: **DIBt, Berlin**
Organism (organisme) notificat(e): **NB 1343 – MPA, Darmstadt**
- ◇ **Performanța (performanțe) declarată (declarate):**

Caracteristici esențiale	Performanță
Rezistență mecanică și stabilitate (BWR 1)	
Rezistențe caracteristice (efecte statice și cvasistatice), Schimbări	Anexa / Annex C1 – C2
Securitatea la incendiu (BWR 2)	
Comportamentul la foc	Clasa A1
Rezistență la foc	Anexa / Annex C3

Performanța produsului de mai sus este performanța / performanța declarată. Producătorul de mai sus este singurul responsabil de întocmirea declarației de performanță în conformitate cu Regulamentul (EU) nr. 305/2011.

Specifications of intended use

Anchorage subject to:

- Static or quasi-static action
- fire exposure

Base materials:

- Reinforced or unreinforced normal weight concrete according to EN 206-1:2000
- Strength classes C20/25 to C50/60 according to EN 206-1:2000
- Cracked and uncracked concrete

Use conditions (Environmental conditions):

- Structures subject to dry internal conditions (zinc plated steel).

Design:

- Anchorages are designed under the responsibility of an engineer experienced in anchorages and concrete work.
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e.g. position of the anchor relative to reinforcement or to supports, etc.).
- Anchorages are designed according to FprEN 1992-4: 2016 and TR 055.

Installation:

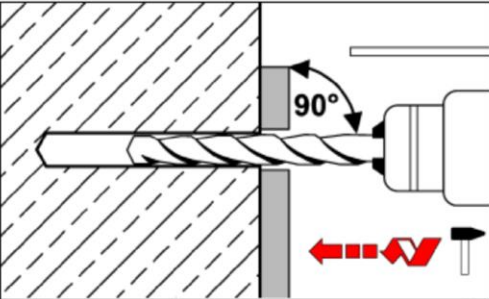

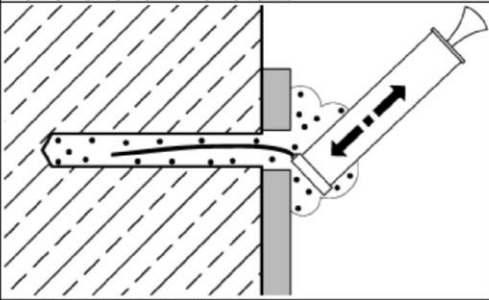

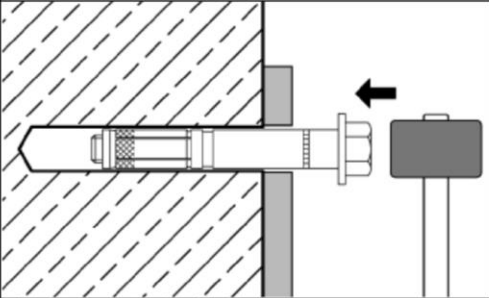

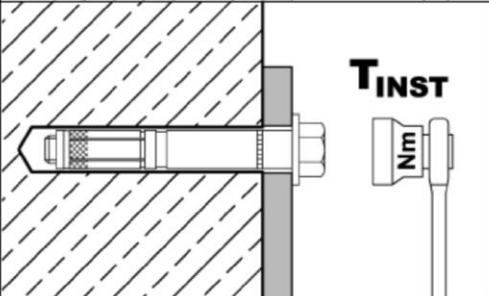

- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site.
- Positioning of the drill holes without damaging the reinforcement
- In case of aborted hole: new drilling at a minimum distance away of twice the depth of the aborted hole or smaller distance if the aborted drill hole is filled with high strength mortar and if under shear or oblique tension load it is not in the direction of load application.
- Anchor installation such that the effective anchorage depth is complied with. This compliance is ensured, when the embedment mark of the anchor does no more exceed the concrete surface
- Drilling by hammer drill bit (use of vacuum drill bit is admissible)

Highload Anchor SLZ

Intended use
Specifications

Annex B1

Installation instructions

1		Drill hole perpendicular to concrete surface. Using a vacuum drill bit, proceed with step 3.
2		Blow out dust. Alternatively vacuum clean down to the bottom of the hole.
3		Drive in anchor.
4		Apply tightening torque T_{inst} by using torque wrench.
